Description

Starlink is a game changer, delivering fast broadband. A fast internet connection supporting FaceTime, streaming, online gaming, video calls and more.

Your business and your crew can have these added operational benefits for just £75 a month over 3 years. A happy crew means a happy ship, and it can help add productivity and profitability.

We can install and support your vessel or fleet, worldwide, with Starlink's fast, cost-effective maritime broadband. It delivers stable global coverage and a scalable satellite communications system.

Starlink makes the best possible companions to X21 Vsat, systems, which have a proven reliability and performance record. [Click here for details...](#)

Ben Squire, customer, has told us after a month's trial on board one of his 8 fishing vessels, "Well, Starlink has been a game changer, it's awesome. Sets up really well. The way it kicks in and out with X21 Vsat is really very, very impressive and the crew are over the moon."

- High-speed internet
- Low latency with speeds of up to 350/40MBPS
- Reliable global maritime service
- Cost-effective, Scalable system
